## Unit 4. RxRenewal Requests and Responses

The RxRenewal Request function is used by pharmacists to generate and send outbound RxRenewal Requests, also referred to as Renewals within VA/VistA. The RxRenewal Request message is sent to the external provider that originally sent the eRx into VistA. After a RxRenewal Request has been sent to the external provider, the provider is able to send a RxRenewal Response back to the requesting pharmacy.

The Pharmacy user is allowed to generate and send an outbound RxRenewal Request when there are no more renewals on the original prescription to fill or if the prescription is expired.

**NOTE:** If the original NewRx Prohibit Renewals is set to true, the user is not allowed to generate renewal requests on the corresponding eRx prescription in Outpatient Pharmacy. A warning message is displayed to the user attempting renewal when the Prohibit Renewals is set to true.

Warning Text: Renewals are prohibited for this eRx.

### 4.1 Generate RxRenewal Requests from Outpatient Profile

To generate a RxRenewal Request, navigate to the patient's Medication Profile in Complete Orders from OERR or Patient Prescription Processing. The Medication Profile displays all of the Rxes associated with the patient. To generate a RxRenewal Request:

1. Select the eRx.

### 4.1.1 RxRenewal Request Precondition Checks and Warnings

There are a number of RxRenewal Request warnings that may display at the time of the outbound RxRenewal Request. For example, a warning displays when <RR> is being used on a non-eRx prescription.

```

                                --- Other OP Actions ---
PN   Progress Note (OP)
AP   Action Profile (OP)
MI   Print Medication Instructions
DO   Display Orders' Statuses
MG   Display FDA Medication Guide
RM   Reprint FDA Medication Guide
RR   RxRenewal Request

Select Item(s): RR   RxRenewal Request
RxRenewal request may not be used. This prescription is not an eRx.
Type <Enter> to continue or '*' to exit: █
```

**Figure 4-6: RxRenewal Request Warning**

A complete list of RxRenewal Request Warnings can be found in [Appendix D: RxRenewal Request Preconditions and Warnings](#) in User Manual Unit (PSO\_7\_0\_P617\_UM\_6) available on the Veteran's Documentation Library (VDL).

## 4.2 RxRenewal Requests in the eRx Holding Queue

Outbound RxRenewal Request messages sent from VistA Outpatient Profile are stored in the Holding Queue. They can be viewed using search criteria or in the <MV> Message View action. To view a RxRenewal Request:

1. From the eRx Holding Queue List screen, type <MV> Message View.
2. Type <RR> RxRenewal Request.

Figure 4-8: Message View Displaying RxRenewal Request Messages

The RxRenewal Request message statuses are displayed in the “Status” column on the eRx Holding Queue. For RxRenewal Request statuses, refer to [Appendix D: RxRenewal Request Preconditions and Warnings](#) in [Unit 6](#).

**NOTE:** RxRenewal Request messages are not in actionable statuses and so, they are not displayed in the Holding Queue's list view. Users may view them only by using <MV> Message View action or using the <SR> Search criteria.

RxRenewal Requests in the Holding Queue without a response or an error received for 2 weeks or more change status from "RRN" (RxRenewal Request - New) to "RRX" (RxRenewal Request Expired) in the Holding Queue.

### 4.3 RxRenewal Responses in the eRx Holding Queue

When a RxRenewal Request receives a RxRenewal Response from an external provider sent from the VistA OP, the RxRenewal Response message is first received by the Hub and is then sent to the VistA Holding Queue. The RxRenewal Response message types include:

- Approved
- Approved with Changes
- Denied
- Denied, New Prescription to Follow
- Replace

RxRenewal Responses that are in actionable statuses are displayed in the Holding Queue's list view. For the full list of RxRenewal Response statuses, refer to [Appendix D: RxRenewal Request Preconditions and Warnings](#) in [Unit 6](#).

To view a RxRenewal Response in the Holding Queue:

1. From the eRx Holding Queue List screen, type <MV> Message View.
2. Type <RE> RxRenewal Response.

Figure 4-14: RxRenewal Response Message Details

**NOTE:** When an Inbound RxRenewal Response is received, if the provider approved “n” as the number of renewals, the Message Details view displays “n-1” as the number of renewals approved. This is applicable to Approved, Approved with Changes, and Replace RxRenewal Response Types.

The RxRenewal Response Information section contains the RxRenewal Response message type along with the response date and time and any additional notes and comments.

Figure 4-24: AC/Accept eRx Renewal

The Response includes information on the eRx prescription renewal that the Response was processed for. The renewed Rx displays in the Active section of the Medication Profile. The Rx number has an “A” appended to the end, indicating this is the first refill. Subsequent renewals include the next letter of the alphabet appended. (i.e., & 123456 changes to & 123456A after the first refill; for next refill: & 123456A changes to & 123456B)

Figure 4-30: Error - Validate Provider Action Not Available

## 4.6.2 Approved with Changes

Another RxRenewal Response message type is Approved with Changes. This indicates the renewal is approved. However, changes must be made prior to renewal.

Depending on the scenario, the RxRenewal Response message may display in the Holding Queue List View screen:

- If changes are only related to only the number of renewals in the Drug segment, the pharmacist does not need to take any action in the Holding Queue, therefore the RxRenewal Response message does not display in the Holding Queue List View.
- If the changes are related to the provider or the provider and number of renewals, the RxRenewal Response displays in the Holding Queue List View because the pharmacist is required to validate the updates.

### 4.6.2.1 Changes to Number of Renewals Only

When a RxRenewal Response message type is Approved with Changes (for number of renewals only), it does not display in the Holding Queue List View screen. It can be found using <MV> Message View or <SR> Search. The status of the Approved with Changes RxRenewal Response is “RXP” (RxRenewal Response Processed).

Figure 4-38: AC/Accept eRx Renewal

The eRx on which Renewals were requested and the Response has been processed, is now reinstated with the Response. The renewed Rx displays in the Active section of the Medication Profile. The Rx number has an “A” appended to the end, indicating this is the first refill. Subsequent renewals include the next letter of the alphabet appended. (Ex: & 123456 changes to & 123456A after the first refill; for next refill: & 123456A changes to & 123456B).
